MOHAMMED SUFYAAN TALISH

AI AND ML STUDENT

Hyderabad | 7993149226 | https://www.linkedin.com/in/mohd-sufyaan-talish |
https://github.com/sufyn| sufyaan4guys@gmail.com

Education

- B. E (AI & ML) | Muffakham Jah College Of Engineering And Technology   2021-2025

- Intermediate | Narayana junior college   2021

- Ssc | St.Anthony's high school   2019

Projects

https://github.com/sufyn

Frentals- Geolocation Social Media Platform: Developed and maintained a geolocation social media platform. Used HTML, CSS, JavaScript, and PHP to create a user-friendly and responsive interface. Integrated with third-party APIs to provide features such as geolocation and payment processing.

Smoking detection: Developed a sophisticated web application leveraging YOLOv5, OpenCV, HTML, CSS, Flask, JavaScript, and Python to achieve real-time smoking detection. Implemented cutting-edge artificial intelligence and computer vision technologies to enhance public health and safety.

Lernit: Designed and implemented an innovative educational technology (EdTech) platform focused on prompt engineering to generate personalized flashcards. Leveraged technologies including Lang Chain, Hugging Face, Flask, HTML, CSS, JavaScript, and Python to create an interactive and dynamic learning experience.

Position Of Responsibility

Tech Lead | Microsoft Student Society, MJCET

Organized & conducted sessions for 60+ college students on git hub and other topics.

Accomplishments

I have become twice a global nominee from hyderabad for Nasa Space Apps Challenge and participated in many more hackathons.
